

Hi everyone!

We are Pete and Liv and we are super excited to be running for your Education Portfolio directors. As fellow students in the law building we have utilised all the great resources that the Education Portfolio have to offer and hope to continue to make them the best resources that they can be.

We strongly believe in improving the Pathfinder program so that long lasting relationships are formed between year levels, improving the MLS's outreach with the Stepping Stones initiative as well as expanding the important Student Tutorial Services so that they are tailored for your education. Additionally, we would love to continue the amazing work that Britt and Amy have started with the Disability Support Drop-In sessions and increase accessibility to education resources generally.

More than improving the set foundations of the Education Portfolio, we hope to create a platform to connect students from different years with each other for private tutoring as well as increase educational seminars beyond the Sir Anthony Mason Lecture.

As we both have been on the LSS Committee before, we are well versed in its operations and feel confident that we can utilise this experience to successfully navigate the Education Portfolio. Additionally, we are both passionate about representing the Committee in a way that is more accessible to the student body.

We have worked in the youth sector, and are both equally passionate about empowering young people to achieve their potential and discover their own pathway through law.

Peter and Liv xoxo
